Re: Liquid Effluent Retention Facility

Dear Mr. Wisness:

We agreed to provide you written direction for the continued viability of the LERF project from a regulatory perspective, following the August 13, 1991 meeting held in our Kennewick office. Our direction is as follows:

1. A valid certification of the integrity of the dikes must be provided as specified in our letter dated July 17, 1991.
2. Paul Stasch is the Ecology Unit Manager for the LERF project and is the point of contact for all regulatory issues regarding it. He must be provided adequate prior notification of all significant construction activities.
3. The complete set of all analytical results of specified tests in the approved CQA plan must be received and evaluated prior to installing the next layer of the liner system.

If there are any questions, comments, or both, please direct them to Mr. Paul Stasch of my staff at (206) 459-6725.

Sincerely,

Timothy L. Nord
Hanford Project Manager
